

PDCommon::Utils::Logger::getInstance

```
graph LR; A[PDCommon::Utils::Logger::getInstance] --> B[PDCommon::Utils::Logger::Logger]; B --> B;
```

The diagram illustrates a call from a static method to a static class. On the left, a grey rectangular box contains the text 'PDCommon::Utils::Logger::getInstance'. A straight blue arrow points from the right side of this box to the left side of a white rectangular box on the right. This white box contains the text 'PDCommon::Utils::Logger::Logger'. Above the white box, a curved blue arrow starts from its top edge and points back to its top edge, representing a self-loop or a recursive call.
