

GRPD::Material::MaterialRegistry::getInstance

```
graph LR; A[GRPD::Material::MaterialRegistry::getInstance] --> B[GRPD::Material::MaterialRegistry::MaterialRegistry]; B --> B;
```

The diagram illustrates a self-call or recursive call. A grey box on the left contains the text 'GRPD::Material::MaterialRegistry::getInstance'. A blue arrow points from this box to a white box on the right containing 'GRPD::Material::MaterialRegistry::MaterialRegistry'. A curved blue arrow then loops back from the right box to itself, indicating a recursive or self-referential relationship.
